

JATIN JETHAVA

FULL-STACK MERN DEVELOPER

Surat, Gujarat, India | +91 81600 82638 | jatinjethava3125@gmail.com
GitHub: github.com/jatinjethava | Portfolio: jatin-jethava.vercel.app

PROFESSIONAL SUMMARY

Passionate Full-Stack Developer with comprehensive expertise across the entire web application development lifecycle, from system architecture design and reactive UI implementation to performant backend engineering and API deployment. Supported by an outstanding academic track record (8.4 CGPA in BCA), I specialize in building responsive React and Next.js client interfaces, scalable Node.js/Express RESTful microservices, Redis in-memory caching layers, and resilient MongoDB data schemas. Committed to writing clean, maintainable, production-ready code with strict security safeguards, automated validation pipelines, and seamless payment gateway integrations.

TECHNICAL SKILLS

Frontend Engineering:	React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, RTK Query, TanStack Query, HTML5 & Modern CSS3, Responsive Design
Backend & APIs:	Node.js, Express.js, RESTful Architecture, Socket.io (WebSockets), JWT Authentication, Role-Based Access Control (RBAC), Nodemailer, Async Event Handling
Databases & In-Memory:	MongoDB (Mongoose ODM, Schema Validations), MySQL (Relational Modeling), Redis (L2 Caching, Sliding Window Rate Limiting, High-Speed Key-Value Store)
Architecture & Patterns:	MVC Architecture, Decoupled Monoliths, Microservice Integration, Client-Side State Normalization, Code-Splitting, Lazy Loading, Database Indexing
DevOps, Tools & APIs:	Git & GitHub (CI/CD Workflows), Docker, Docker Compose, Postman API Testing, Cloudinary Media API, Razorpay Payment Gateway, Linux/Bash CLI, Vite Bundler

EDUCATION

Bachelor of Computer Applications (BCA)	Current CGPA: 8.4 / 10 (Sem-6)
Sutex Bank College of Computer Application & Science (VNSGU), Surat, Gujarat	Expected Graduation: March 2026
Key Disciplines: Full-Stack Web Development, Data Structures & Algorithms, Relational Database Systems, Network Security	
Higher Secondary Certificate (HSC – 12th Commerce)	Score: 83.0%
Gujarat Secondary and Higher Secondary Education Board (GSEB)	Completed: March 2023
Secondary School Certificate (SSC – 10th)	Score: 92.0%
Gujarat Secondary and Higher Secondary Education Board (GSEB)	Completed: March 2021

KEY COMPETENCIES & ENGINEERING PRACTICES

- Architectural Design & Standards: Disciplined execution of MVC pattern, decoupled API routers, clean request-response lifecycles, structured error middleware, and strict input sanitation.
- Caching Strategies & Concurrency: Deployment of Redis L2 caching for frequently queried datasets, sliding window rate limiters to shield against DDoS, and normalized state slices with Redux Toolkit.
- Authentication & Security Hardening: Implementation of secure JWT token authentication with refresh cycles, role-based route guards (RBAC), bcrypt credential hashing, and CORS isolation.
- Version Control & Team Collaboration: Active Git workflows including feature branching, clear commit discipline, semantic versioning, pull request reviews, and environment parity across development and production.

LANGUAGES & COMMUNICATION

Languages: English (Professional Working) | Hindi (Full Professional) | Gujarati (Native / Mother Tongue)

PROJECT 1: VASTRA VERSE – ENTERPRISE MERN E-COMMERCE PLATFORM

Full-Stack Fashion Commerce Platform

Lead Full-Stack Developer | Live Architecture

- Technologies:** React.js, TypeScript, Node.js, Express.js, MongoDB, Tailwind CSS, Redux Toolkit, Socket.io, Razorpay API, Cloudinary
- Enterprise System Architecture: Architected and deployed an enterprise-grade fashion e-commerce ecosystem featuring decoupled frontend and backend applications with robust schema validations and normalized data models.
 - Secure Authentication & RBAC: Engineered robust authentication utilizing JWT tokens, role-based authorization guards (User/Admin), automated OTP email verification, and bcrypt password hashing.
 - Interactive Catalog & Storefront: Built an interactive and fully responsive customer storefront equipped with instant multi-facet filtering, debounced search, persistent cart drawer, and client-side state caching.
 - Payment Gateway & Webhooks: Integrated Razorpay payment gateway enabling smooth checkout workflows, cryptographic payment signature verifications, webhook listeners, and integrated user wallet functionality.
 - Real-Time WebSockets Engine: Integrated Socket.io WebSockets to power real-time order tracking notifications, live inventory decrementing, and instant dispatch updates for active shoppers.
 - Administrative Operations Suite: Constructed an administrative back-office console with comprehensive CRUD tools for managing product inventories, categories, discount coupons, and dynamic hero banners.
 - Invoicing & Media Optimization: Automated dynamic PDF invoice generation for completed transactions and integrated Cloudinary CDN for responsive, bandwidth-optimized image delivery.

PROJECT 2: BUNSTORY – RESTAURANT & FOOD ORDERING PLATFORM

Full-Stack Food Ordering Web Platform

Full-Stack Engineer | Responsive Application

- Technologies:** React.js, Node.js, Express.js, MongoDB, RESTful APIs, Tailwind CSS, LocalStorage Session Sync
- Ordering Flow & Real-Time Cart: Designed an intuitive burger ordering web platform featuring responsive customer ordering flows, ingredient add-ons, dynamic tax calculations, and persistent cart sessions.
 - Backend API Infrastructure: Structured backend RESTful APIs using Node.js and Express.js to facilitate product catalog browsing, cart operations, user profile management, and order processing.
 - Kitchen Management Console: Built dedicated administrative screens allowing store managers to create, update, and organize menu categories, food items, pricing tiers, and incoming order statuses.
 - Resilience & UX Engineering: Implemented client-side form validation schemas, custom toast notifications, and centralized server-side error handling middleware to deliver a smooth end-user experience.

PROJECT 3: MERN PORTFOLIO & PRODUCTION CONTAINER ARCHITECTURE

Full-Stack Monolith & Production Infrastructure

DevOps & Full-Stack Engineer | Live System

- Technologies:** TypeScript, Next 15, Express.js, Docker Compose, Redis 7 (Alpine), MongoDB Atlas, Tailwind CSS v4
- Monolithic Container Packaging: Architected multi-stage Docker build packaging both Vite React static frontend and Express backend into a unified production container serving port 8100.

- Redis Caching & Sliding Rate Limiter: Engineered Redis L2 cache layer with LRU eviction and automated IP-based rate limiting to protect public endpoints and contact inquiry dispatchers.
- Dynamic In-Browser PDF Engine: Developed custom jsPDF client-side document compiler with pixel-perfect vector rules, hanging bullet indentation, and ATS-optimized executive layout.

DECLARATION & SIGN-OFF

I hereby confirm that all the details furnished in this curriculum vitae are authentic, complete, and accurately reflect my academic qualifications and technical project engineering experience.

Place: Surat, Gujarat, India

Candidate: Jatin Jethava
